

## Overview

GroRoof<sup>®</sup> is a true hybrid modular system, providing all the benefits of a traditional (monolithic) roof garden while offering all the advantages of a modular green roof.

## Features

- 25 water-holding reservoirs per square foot  
Reservoir diameter 1.5" | Reservoir depth 1"
- Dedicated drainage channels
- Metro D-Lite<sup>®</sup> engineered lightweight soil
- Fully removable side walls for seamless vegetation
- MGV GroMat<sup>®</sup> for water retention, filtration, and aeration
- Pre-grown established vegetation - minimum 80% coverage.

## Benefits

- + Reservoirs for additional stormwater holding capacity
- + The only modular green roof system that can claim 100% soil-to-soil contact
- + Air pruning to promote a healthy root system
- + Ergonomic, streamlined design for easy transportation and labor efficient installation.

## Extensive Options

- I [3.5"] 18"x18"x4.5" | 18-26 lbs per sf
- II [4.5"] 18"x18"x5.5" | 26-32 lbs per sf
- III [5.5"] 18"x18"x6.5" | 32+ lbs per sf
