

## Overview

Specially blended lightweight growing medium composed of organic and mineral materials. Metro D-Lite® provides a stable substrate for the vegetation and has excellent moisture and nutrient retention. The soil resists compaction and facilitates effective drainage.

## Features

The percentage of organic to inorganic material is dependent upon the type of vegetation planned for the green roof.

Mixes can be engineered for intensive, extensive or semi-extensive green roofs.

## Benefits

MGV has experienced horticultural experts who will be available to customize soil mixes and plant combinations for your design needs. MGV utilizes pumice as an aggregate for our ultra lightweight medium.
