

Benefits

- + Made from 100% recycled plastic
- + Rigid and strong enough to resist cracking
- + An affordable and more labor efficient alternative to conventional pedestal systems

Specifications

Available in different height options to work seamlessly with Extensive I, Extensive II, and Extensive III GroRoof® Modules

GroRoof® Paver Platforms are designed to work with:
Standard 17 5/8" x 17 5/8" pavers.

Overview

New GroRoof® Paver Platforms allow you to incorporate paver patios and walkways into your green roof design. In just a few simple steps,

GroRoof® Paver Platforms provide a fully functioning paver base system for all your green roof applications. As an added benefit, GroRoof® Paver Platforms are designed as a stand-alone application, or can be fully integrated with the GroRoof® hybrid modular green roof system.

Features

GroRoof® Paver Platforms provide the perfect conduit for running "hidden" irrigation lines, landscape lighting wires, and audio/visual cords. Platforms can be easily lifted for quick access to the roof and waterproofing membrane.
